VOLUME CONTENTS

VOL. 26, NO. 1 CONTENTS 1986

Translation of Number 1

B. P. PUGACHOV 1 Some applications of the spectral expansion of matrices

S. F. GILYAZOV 8 Regularizing algorithms based on the conjugate-gradient method

M. V. AREF'YEVA 13 Optimal and quasi-optimal regularizing algorithms for solving stochastic integral equations of the convolution type

V. S. FILINOV 21 Construction of a Monte-Carlo method for calculating Feynman integrals

R. MÄRZ 30 On correctness and numerical treatment of boundary value problems in differential-algebraic equations

V. T. IVANOV and G. N. NEKHAYEVA 40 Numerical solution of external boundary value problems for elliptic equations

A. V. KRYLOV 44 The asymptotic integration of weakly non-linear systems with partial derivatives

A. V. GONCHARSKII and V. V. STEPANOV 50 Inverse problems of coherent optics. Focussing in a line

S. A. GABOV and B. B. ORAZOV 58 The equation

$$\frac{\partial^2}{\partial t^2}[u_{xx} - u] + u_{xx} = 0$$

and several problems associated with it

A. N. VERETENTSEV, V. YA. RUDYAK and N. N. YANENKO 65 The construction of discrete vortex models of ideal incompressible fluid flows

A. T. FEDORCHENKO 71 On vortex outflow through the permeable boundary of the computational domain of non-stationary subsonic flow

Short Communications

A. A. KRONBERG 80 Random walk over spheres algorithms

V. A. BEREZNYEV, V. G. KARMANOV and A. A. TRET'YAKOV 84 The stabilizing properties of the gradient method

V. K. TOLSTYKH 86 Application of the gradient method to problems of optimizing systems with distributed parameters

M. V. IVANOV 88 A difference solution of the one-particle Schrödinger equation with axisymmetric potential

A. V. DRORAK and D. A. TESELKIN 91 Numerical solution of two-dimensional problems of the pulse motion of floating bodies

A. S. ANTIPIN 96 Extrapolation methods of computing the saddle point of a Lagrange function and application to problems with block-separable structure

V. N. SOLOV'EV 97 Sufficient conditions for global minimum in partially convex constrained problems

YU. I. MOKIN 98 A method of calculating a simple layer potential

Translation of Number 2

V. N. NEFEDOV 99 Approximation of a set of pareto-optimal solutions

V. G. ZHADAN 108 A method for the parametric representation of objective functions in conditional multicriterial optimization.

A. A. ZHIGLYAVSKII 116 Optimal weighted Monte-Carlo methods

M. V. FEDORYUK 121 The WKB-method for a non-linear equation of the second order

O. E. BURYAK 129 The Cauchy problem for the linearized Landau equation

I. G. DYAD'KIN 134 On efficient algorithms for the modelling of neutron and γ-quanta transport events by the Monte-Carlo method

V. E. TROSHCHIEV and V. A. SHUMILIN 141 A difference scheme for solving the two-dimensional transport equation on irregular tetragonal nets

A. S. BARASHKOV and G. I. BARASHKOVA 149 Determination of the coefficient of Helmholtz's equation from the boundary values of the solution

D. G. PERADZE 157 A difference scheme for a non-linear problem on the bending of a plate

N. N. KANAYEVA and O. A. SHCHERBINA 162 On a modified local algorithm for problems of discrete programming

YU. A. ZUEV 170 A probability model of a committee of classifiers

Short Communications

O. M. MAKAROV 179 An algorithm for multiplying 3×3 matrices

N. I. KOZLOV and L. N. SOKOLOVA 180 The integral form of the solution of a problem on radio pulse propagation in a non-conducting medium

G. N. KURAYEV 184 On the solvability of the problem of stationary heat convection with radiant convective heat exchange on the boundary

M. P. BELYANIN 188 On the asymptotic solution of a model of a $(p$–$n)$ junction

A. L. KOPA-OVDIYENKO 193 On the use of Lagrange coordinates for modelling light beams with strong spatial deformation

VOL. 26, NO. 2 CONTENTS 1986

Translation of Number 3

A. V. LOTOV 1 An estimate of the effect of rounding errors on the accuracy of the elimination of variables in sets of linear inequalities

A. S. NEMIROVSKII 7 The regularizing properties of the adjoint gradient method in ill-posed problems

A. V. SERGEYEV 17 A recursive algorithm for Padé–Hermite approximations

V. K. DZJADYK 23 An approximation-iterative method of approximating the solution of Cauchy's problem for ordinary differential equations using polynomials

L. F. YUKHNO 32 A method of accelerating the iteration processes of solving difference equations

O. P. CHUYAN 37 An optimal single-step algorithm for maximizing doubly differentiable functions

V. A. GALAKTIONOV, S. P. KURDYUMOV, S. A. POSASHKOV and A. A. SAMARSKII 48 A non-linear elliptic problem with a complex spectrum of solutions

A. I. ZUEV and V. G. NIKOLAYEV 54 Iterational methods of solving equations of gas dynamics

S. A. ABRAMOV, E. A. KAZ'MINA and V. A. KUKLYAEVA 60 Variants of semantics of inaccurate data and the approximate performance of programs

V. A. DAUGAVET and A. V. LAZAREV 67 Development of Dantzig's method in quadratic programming

V. D. SKARIN 73 An approach to the analysis of improper problems of linear programming

V. A. ZHEVNEROV and I. D. RODIONOV 79 Optimal design of information systems by the parameter evolution method

Short Communications

M. A. IVANOV 84 An economic algorithm for solving systems of difference equations with a block-tridiagonal matrix

N. N. KALITKIN and I. V. RITUS — 87 The smooth approximation of Fermi–Dirac functions

V. P. KUTOV and V. V. SMELOV — 90 Finite approximations of the spherical harmonic method with different orders in spatial subregions

V. I. ABRAMOV, A. P. KARTASHEV and A. S. ROSHAL′ — 93 A method for the non-linear analysis of the sensitivity of mathematical models

Translation of Number 4

V. I. MELESHKO — 98 Regularized non-orthogonal factorizations and pseudoinversions of perturbed matrices

A. M. LEVIN — 108 Calculation of the degree of incompatibility of operator equations of the first kind

V. A. SROCHKO and R. G. KHAMIDULIN — 113 The method of successive approximations in optimal control problems with boundary conditions

A. A. BELOLIPETSKII and A. YU. RYABOV — 122 Asymptotic estimates of solutions of the problem of the optimal speed of response near the points of discontinuity of an isochronous surface

P. A. DOROFEYEV — 131 A scheme of iterative minimization methods

YU. R. ROMANOVSKII — 137 The asymptotic properties of analytical solutions of the non-linear Boltzmann equation

A. E. POYEDINCHUK, V. P. SHESTOPALOV and N. P. YASHINA — 142 Spectral theory of a coaxial-waveguide resonator

G. V. MOLADZE and D. V. POTSKHISHVILI — 148 Convergence of difference schemes of gas dynamics in quasi-Lagrange variables

I. N. MOLCHANOV and V. E. RYABTSEV — 155 Direct methods of solving systems of linear algebraic equations with parallel organization of the computations

S. I. MAZURIK and V. P. SHAPEYEV — 162 Use of computer symbolic transformations for studying the approximation and stability of difference schemes

A. V. BABAKOV, O. S. BATSUKOV, O. M. BELOTSERKOVSKII and L. N. STOLYAROV — 171 On the possibility of attaining high productivity in the solution of problems of mathematical physics using vector pipeline digital computers

Short Communications

YU. A. POLOVKO — 180 A numerical method of solving non-linear two-point boundary value problems

V. S. ANTUFEYEV — 183 Solution of integral equations of the second kind with a stochastic kernel using the Monte-Carlo method

E. V. AKHMATSKAYA and L. A. POZHAR — 185 Calculation of transport collision integrals for a Lennard–Jones gas

V. V. NEKRUTKIN and N. E. PRIGARO — 190 On the rate of convergence to the boundary of some versions of the spherical process

E. V. ZAKHAROV and I. V. SOBYANINA — 194 On one-dimensional integro-differential equations for problems of diffraction by screens

VOL. 26, NO. 3 CONTENTS 1986

Translation of Number 5

A. S. BRATUS — 1 Multiple eigenvalues in problems of optimizing the spectral properties of systems with a finite number of degrees of freedom

A. V. STARKOV — 8 New estimates of the variance in the Monte Carlo method when an approximate value function is used

I. KH. SIGAL — 14 Computational implementation of a combined branch and bound algorithm for the travelling-salesman problem

O. O. Galaktionova and V. A. Zlatoustov	20	2π-Periodic solutions of Duffing's equation
V. A. Zabolotnov	28	A method of refining averaged systems of differential equations
E. I. Tikhomirova	33	The convergence of a finite-difference scheme for a non-linear evolution equation
N. V. Nikitin	39	The use of continuous integrals to determine the eigenvalues of the Fokker–Planck equation
M. F. Perebinos and R. P. Fedorenko	44	Methods of mathematical programming in problems of optimal antenna design
N. A. Blinov, V. V. Boiko, I. A. Leont'ev, V. P. Sinel'nikov, S. S. Filippov, M. I. Tsatsulin and N. V. Cheburkin	51	Development of overheat instability in the plasma of a high pressure space discharge
N. D. Kopachevskii and A. N. Temnov	58	Vibrations of a stratified liquid in a basin of arbitrary shape
M. Yu. Shashkov and I. B. Shchenkov	73	The use of symbolic transformations to construct and study difference schemes
		Short Communications
V. N. Karmazin	79	The regularization of sets of linear inequalities
S. A. Nekrasov	83	A bilateral method of solving Cauchy problems
L. D. Ivanovich, B. S. Iovanovich and E. E. Shili	87	The convergence of difference schemes for a biharmonic equation
M. Kh. Khairullin	90	The solution of converse problems of subterranean hydromechanics by Tikhonov-regularizing algorithms
K. S. Mamedov	92	The equation of the oscillations of a compressible rotating fluid and the spectral properties of the connected operator pencil
Z. T. Nazarchuk	97	Computation of a class of integrals with a logarithmic singularity
		Letter to the Editor
A. A. Charakhch'yan	98	Remark on the paper "On one decomposition scheme for the equations of gas dynamics"
		Translation of Number 6
I. M. Sobol	100	A multicriterial interpretation of the method of regularizing ill-posed problems
A. M. Vershik and P. V. Sporyshev	104	An asymptotic estimate of the average number of steps of the parametric simplex method
S. A. Voitsekhovskii, I. N. Gavrilyuk and V. S. Sazhenyuk	113	Estimates of the rate of convergence of difference schemes for variational elliptic second-order inequalities in an arbitrary domain
A. I. Gasanov and I. E. Kaporin	120	Use of the exclusion method in solving strictly elliptic systems using the finite element method
A. R. Maikov, A. G. Sveshnikov and S. A. Yakunin	130	A difference scheme for the non-stationary Maxwell equations in waveguide systems
V. I. Gryn	139	The inverse problem of the linear theory of radiation transfer
T. Z. Muldashev and U. M. Sultangazin	151	The method of spherical harmonics for solving the radiation transfer problem in a plane-parallel atmosphere
S. N. Vorob'ev, L. N. Litvitsenko and S. L. Prosvirnin	159	Wave diffraction by a periodic structure consisting of inclined metal tapes
E. I. Andriankin, V. A. Andrushchenko and N. N. Kholin	167	Algorithm for solving three-dimensional problems on non-stationary wave processes in condensed media
V. M. Krivtsov	172	On a numerical scheme for solving the Navier–Stokes equations

L. V. SHURSHALOV 179 Calculation of the explosion of a rapidly flying body

Short Communications

L. PLASKOTA 186 Optimal linear information in the problem of reconstructing the global maximum of a real function

S. L. IVANOV 190 A method for locating a limit saddle point

A. M. KUZYK and V. L. MAKAROV 192 The rate of convergence of a difference scheme using the sum approximation method for generalized solutions

A. S. IL'INSKII and O. B. POPOV 197 An algorithm for calculating the reflection coefficients in problems of diffraction by smooth corrugated surfaces in inhomogeneous media

E. F. ZHIGALKO 200 A scheme for computing near-axisymmetric gas flow and supersonic flow past a cylinder end-face at a low angle of attack

YU. I. KHUDAK 203 One class of solutions of a homogeneous system of Maxwell equations for an isotropic medium

VOL. 26, NO. 4 CONTENTS 1986

Translation of Number 7

YU. M. NECHEPURENKO 1 A polynomially stable fast parallel algorithm for tridiagonal systems

YU. L. GAPONENKO 6 The problem of the stability of the solution of an integral equation of the first kind in a weak compactum

D. V. DOVNAR and K. G. PREDKO 13 Use of orthogonalization of the mappings of basis functions for regularized restoration of a signal

M. V. MIKHALEVICH 22 Estimates of the rate of convergence of a method of seeking the most preferable element

M. YA. KOVALEV and YA. M. SHAFRANSKII 30 The construction of ϵ-approximate algorithms for the optimization of functions in successively constructed sets

G. I. SHISHKIN 38 Solution of a boundary value problem for an elliptic equation with a small parameter for the leading derivatives

S. N. LEORA, S. A. NAZAROV and A. V. PROSKURA 47 Derivation of limiting equations for elliptic problems in thin domains using computers

P. N. VABISHCHEVICH 58 Numerical solution of the inverse problem of the MHD-equilibrium of a plasma

M. V. KLIBANOV 67 Uniqueness of the solution of two inverse problems for a Maxwellian system

L. B. PRIGOZHIN 74 A quasivariational inequality in the problem of filling a shape

S. K. BETYAYEV 79 Topology of two-dimensional selfsimilar motions

Short Communications

O. A. SHCHERBINA 88 A unimodular problem of integer programming

A. S. BELOMYTTSEV and V. N. KARABAN 91 An algorithm for solving a non-linear boundary value problem for ordinary differential equations in multivalued regions

L. N. TARASENKO 93 Numerical solution of a problem with an oblique derivative

YU I. KHUDAK 95 An estimate of the reflection coefficient of a system of dielectric layers

VS. M. KUZNE and N. G. USHAKOV 100 The problem of the numerical restoration of a wave front from the intensity distribution

Translation of Number 8

YU. L. GAPONENKO 104 The parameter-extension method for an equation of the second kind with a Lipschitz-continuous and monotonic operator

E. O. MOVSESYAN — 110 Calculation of the zeros of a quasipolynomial using the argument-derivative method

G. A. MIKHAILOV — 116 Vector Monte-Carlo methods for calculating iterations of integral operator resolvents

E. A. NURMINSKII — 122 A class of convex programming methods

K. A. ABUOV and V. P. CHERENIN — 129 Synthesis of one-product two-stage production–transport networks

I. A. BLATOV — 138 Convergence in a uniform norm of Galerkin's method for a singularly perturbed boundary value problem

S. P. KURDYUMOV, E. S. KURKINA, A. B. POTAPOV and A. A. SAMARSKII — 148 Complex multidimensional structures of the combustion of a non-linear medium

A. G. DAIKOVSKII, YU. I. PORTUGALOV and A. D. RYABOV — 159 A program package for designing accelerating structures

N. YU. ORLOV — 165 A method of calculating selfconsistent potentials for a mixture of chemical elements

S. A. GABOV, B. B. ORAZOV and A. G. SVESHNIKOV — 170 On the non-stationary theory of internal waves

S. I. SMAGIN — 178 On a numerical algorithm for computing fields in laminated media

YU. I. ZHURAVLEV and A. YU. KOGAN — 184 An algorithm for constructing a disjunctive normal form equivalent to the product of the left-hand sides of Nelson Boolean equations

Short Communications

A. F. ROOZE — 188 An asynchronous iteration method of solving non-linear equations using parallel approximation of an inverse operator

R. E. GUT, V. V. EGOROV and V. N. IL'IN — 192 A method of generating pseudorandom normal numbers

S. S. ARTEM'EV and I. O. SHKURKO — 193 An algorithm of variable order and step based on methods of the Rozenbrok type

YU. A. BONDARENKO and V. N. SOFRONOV — 195 The use of energy Lagrangian coordinates for a numerical solution of the one-dimensional heat conduction equation

V. V. BELIKOV — 198 On a method of constructing computational meshes

V. A. GAL'BURT, M. F. IVANOV and O. A. RYABOV — 201 Calculation of ionization when modelling high-temperature hydrodynamic effects

V. I. GRYN — 204 On the existence and uniqueness of a solution of the energy and radiation transport equations

YU. I. MOKIN — 206 Methods of solving the integral equations of potential theory

VOL. 26, NO. 5 CONTENTS 1986

Translation of Number 9

V. A. MOROZOV and A. B. NAZIMOV — 1 The necessary and sufficient conditions of regularizability of degenerate sets of linear algebraic equations using the shift method

V. I. GRYN and S. A. YAKOVLEV — 7 Estimate of the accuracy of solving an ill-posed problem using averaging functions

A. K. PONOMARENKO — 18 Estimate of the residue of a cubature formula for some singular integral

E. D. ALYMKULOV and N. K. LUK'YANOV — 23 A method of approximately aggregating linear systems

L. D. POPOV — 30 Linear correction of ill-posed convexly concave minimax problems using the maximin criterion

O. A. SHCHERBINA	40	A modified local algorithm for solving block problems of discrete programming
A. M. BEREZMAN, M. K. KERIMOV, S. L. SKOROKHODOV and G. A. SHADRIN	48	Calculation of the eigenvalues of Mathieu's equation with a complex parameter
YU. I. MOKIN	56	The calculation of Green's functions for elliptic equations
D. S. FILIPPYCHEV	61	Numerical modelling of the propagation of compensated electron beams in a bounded system
V. N. KOTEROV, T. M. PLYSHEVSKAYA, I. N. SIDOROV and A. V. SHIPILIN	68	Calculation of the output characteristics of a continuous electro-ionization CO_2 laser using a two-dimensional mathematical model
N. V. MIKHAILOVA, V. F. TISHKIN, N. N. TYURINA, A. P. FAVORSKII and M. YU. SHASHKOV	74	Numerical modelling of two-dimensional gas-dynamic flows on a variable-structure mesh
		Short Communications
A. M. GRIGORYAN	84	New algorithms for calculating discrete Fourier transforms
V. F. APEL'TSIN, A. S. IL'INSKII and B. R. SABITOV	89	On the approximation of vector fields
A. K. SHATOV	91	On the diffraction of acoustic waves by an inclined half-plane in a stratified liquid
V. S. CHELYSHKOV	94	The use of the method of integration with respect to a small parameter to calculate the laminar boundary layer on a cylinder
G. D. BABE and E. L. GUSEV	97	On the degeneracy of the necessary conditions of optimality in problems of synthesizing optical interference coatings
V. N. SNYTNIKOV	101	A monotonic scheme of through computation based on an implicit algorithm of flux correction
D. N. GAINANOV	104	A graph-theoretic algorithm for constructing a committee of an inconsistent system of linear inequalities
V. N. GRYN	106	Variational principles for the transport equation and the method of spherical harmonics
		Translation of Number 10
S. M. ALIAKBAROV and E. M. MUKHAMADIEV	108	Investigation of the correctness of an extremal problem
SH. I. GALIYEV	116	Obtaining an approximate solution of a maximin with connected variables and of a multiple maximin
N. M. POPOV	125	Approximate solution of multicriterion problems with functional limitations
S. KH. DZHUMAGAZIYEVA	135	Analysis of the properties of solutions of some non-linear equations
I. I. KUDISH	142	Numerical methods of solving a class of non-linear integral and integro-differential equations
N. K. MAKASHEV	155	Methods of deriving the equations of gas dynamics in the case of high-threshold reactions
YU. N. KONDYURIN	164	A statistical approach to the solution of the Boltzmann equation
V. F. APEL'TSIN, A. S. IL'INSKII and B. R. SABITOV	169	Fundamentals of a modified partial projection method for problems of scattering from hydrometeors
S. V. TROFIMOV	181	The optimal reduction of the number of equations in systems of Nelson's type
V. V. ZADOROZHNYI	186	A method of synthesizing a correct recognition algorithm for a given control sample

Short Communications

S. A. DZHANGIROVA 191 Error accumulation in solving sparse systems of linear algebraic equations with a principal diagonal

V. I. BUSHUEV and I. K. LIFANOV 195 Numerical solution of singular integral equations in a class of singular functions and the problem of blowing of the flow in aerodynamics

A. V. GULIN and S. I. KOVALEV 200 The spectrum of a difference scheme in irregular nets

V. B. GORSKII 204 The variational principle and canonical equations of electrohydrodynamics

O. A. SHCHERBINA 207 On local algorithms with variable neighbourhoods and indicator information

V. N. OSIPOV 211 Monotonic Boolean functions and incompatible systems of inequalities

VOL. 26, NO. 6 CONTENTS 1986

Translation of Number 11

YU. A. BELOV and V. S. KAS'YANYUK 1 Mathematical models and a computing experiment in problems of restoring signal functions from a finite set of data

E. S. KEL'MAN 9 Evaluation of directions of fastest rise in discrete maximin optimal planning problems

L. YU. MOTYLEV 15 Asymptotic solutions of the Orr–Sommerfeld equation with a point of rotation of high order

I. P. GARILYUK and V. S. SAZHENYUK 20 Estimates of the rate of convergence of the penalty and net methods for a class of fourth-order elliptic variational inequalities

V. V. REPYAKH 26 Application of a version of the method of superelements to solving a plane problem of the theory of elasticity

V. YU. GUSEV and M. YU. KOZMANOV 34 Methods of solving the implicit difference equations approximating the heat radiation transport equation

V. V. OSTAPENKO 39 On the convergence on a shock wave of continuous calculation difference schemes which are invariant with respect to similarity transformations

A. N. KRAIKO, N. I. TILLYAEVA and S. A. SHCHERBAKOV 50 A method of computing ideal gas flows in plane and axisymmetric nozzles with contour breaks

A. S. DZYUBA and V. I. SHISHKIN 59 Teaching in syntactic pattern recognition

V. I. MILESHIN 65 Calculation of three-dimensional supersonic flow around air intakes in regimes with a detached shock wave

K. V. RUDAKOV 75 On some universal constraints for classification algorithms

Short Communications

I. P. RYAZANTSEVA 81 On the quasi-optimal choice of regularization parameter when solving non-linear equations with monotonic operators

S. A. MAIOROV 85 A method of solving the equations of gas dynamics for plasma with a non-equilibrium ionic composition

V. I. ZUBOV, M. V. KRIVTSOV, N. N. NAUMOVA and YU. D. SHMYGLEVSKII 88 A numerical comparison of different models of metal vapourization

A. M. MAKSIMOV and G. G. TSYPKIN 91 A mathematical model for the freezing of a water-saturated porous medium
